**MAKE USE OF THE FULL POWER
OF ALOE VERA**

DEAR FRIENDS,

For 35 years, we have had one vision: We want to help all people to become 100 years young in good health, full of vitality and with great success. Of course this is a dream – but we work hard to make it come true. That is why we develop innovative solutions for health and beauty as well as for more personal and financial success.

Our aim: “More quality for your life.” – for everyone.

With unique products, which contribute to peoples' constantly increasing health awareness, we have been fully in line with the trend – for 35 years! Aloe vera, a unique plant with its extraordinary and diverse possibilities, plays an outstanding role for us. Both for health issues and beauty care – the all-rounder Aloe vera simply belongs to every household.

And since health is our most precious commodity, we at LR invest in exceptional quality. We can proudly say that we opened what is probably the most modern production site for Aloe vera products in Europe at our headquarters in Ahlen last year. For us, “Made in Germany” is not just an advertising slogan, but a promise of quality to all our customers!

For 35 years, we have been giving our sales partners the chance to lead a self-determined and successful life.

What is a matter of course for LR provides many people with the income and freedom to achieve more quality of life. We offer everyone the opportunity to organise their own working hours and become part of an internationally successful team.

All employees and LR sales partners work on this vision every day with great passion.

Kind regards.

A healthy diet is important to you. You want to be sure that you and your family are always supplied with important nutrients. However, you also have a lot to do every day and you do not always manage to ensure a balanced diet. LR LIFETAKT Daily Essentials makes it easy for you to eat healthy in hectic everyday life¹.

¹ Vitamin C in Aloe Vera Drinking Gel Traditional with Honey contributes to a regular energy metabolism and a functioning nervous system. Magnesium in Pro Balance contributes to the reduction of fatigue and exhaustion and to maintaining electrolyte balance.

Daily Essentials

A nutrient supply that gives you new energy every day.

Your life is colourful, diverse and there is always something to do. For example if you are on the move with your family from dawn to dusk. Or if the short lunchbreak at work only leaves time for some fast food to go. Hobbies and friends should not be neglected, of course. You don't want to miss anything – but you don't want to do without a healthy diet either.^{1,2}

Because it's very important to you. You know that you need sufficient nutrients to have enough energy for your busy day. Whether as a family manager, at the workplace or as a true sports fan: You know that power only comes from a nutritious diet. Expert Tips

EXPERT TIPS:

“Daily intake of all essential nutrients such as vitamins, minerals and trace elements in sufficient quantity forms the basis of a healthy life. There are also other important components that influence our daily well-being. Therefore, I recommend integrating the following simple tips on nutrition, lifestyle and exercise into your everyday life.”

Dr. Sven Werchan, nutrition expert

Dr. Sven Werchan
Nutritional expert

LIFESTYLE

A healthy lifestyle means well-being on many different levels. The most important basis is loving yourself.

- Be good to yourself. Not too harsh. Not too critical. You will see how good that feels.
- Let go of everything that is not important to you or does not do you any good. Clean up: real-life AND digital clutter: Unsubscribe from unnecessary newsletters and empty your email inbox.

NUTRITION

Start with small changes that you can easily integrate into your daily routine – but that make a big difference.

- For example, work in wholemeal days and try: Brown rice, wholemeal pasta and of course bread.
- Eat a lot of green vegetables: broccoli, rocket, kale, spinach or Chinese cabbage provide many valuable vitamins.

MOVEMENT

The most important thing about exercise is to move at all. You should integrate it into your daily life, if possible.

- Take the stairs at least once a day instead of the lift or escalator. Your muscles will appreciate it.
- Combine what's useful with what's business: Why not have your next meeting while taking a walk around the block?

Mental Power

ENHANCED PERFORMANCE IN EVERY SITUATION!

You always give your best. Whether at the job, at university or in everyday family life: You challenge yourself or you are being challenged. This often leads to stress. LR LIFETAKT Mental Power gives you the power and serenity to master any situation in everyday life, no matter how demanding^{1,2,3,4}.

¹ Vitamin E in Mind Master helps protect the cells from oxidative stress.

² Thiamine and vitamin B12 in Mind Master contribute to a regular energy metabolism.

³ Vitamin B12 in Mind Master contributes to your mental health.

⁴ Magnesium in Pro Balance contributes to electrolyte balance.

Mental Power

Your answer to challenges in everyday life: power.

Taking on challenges and mastering them is a part of everyday life. The challenges of everyday – professional and private – life can motivate us to small and major feats. Some people even need this stress to reach their full potential. But if you demand a lot from your body, you also have to give something back. And find a healthy balance between stress and relaxation. Whether you are a student in the middle of your exam period or a

young parent permanently under stress juggling the double burden of household and job. Whether you are a professional or an athlete continually rising beyond yourself – you all have one thing in common:

You want to remain productive in the long run. But not just like this, but with success, so that your body remains efficient even under stress. LR LIFETAKT has a solution for you.

Challenging everyday life, intensive lifestyle?

Expert Tips

EXPERT TIPS:

“If you work and live at a fast pace, you have to supply your body with various nutrients. But that is not all: to make sure that challenges do not become stressful, you should take physical and mental time-outs from time to time. A combination of healthconscious nutrition, sufficient exercise and a healthy lifestyle will lead you directly to your goal. The expert tips help you maintain your performance level and increase your energy level.”

LIFESTYLE

If you achieve high performance every day, you also have to make a little room for yourself.

- 2 minutes of conscious breathing with closed eyes relaxes the nervous system and creates a new balance. Tensions are released automatically.
- One media-free day per week can have a very inspiring effect. Switch off the TV, radio and, if possible, the mobile phone.

NUTRITION

Whether super food or local fruit and vegetables – it is important to eat a varied diet. The more colourful the plate, the more diverse the nutrients you take in.

- It is not without reason that nuts are a typical snack food for students. Eat a variety of foods and mix walnuts, Brazil nuts or cashews with some extra dry fruit.
- The ultimate breakfast: Rolled oats with cinnamon, fresh berries and nuts. That will make you fit and happy.

MOVEMENT

Exercise helps relieve stress and normalise blood sugar and blood fat levels.

- If you sit a lot because you have to work hard at work or for your studies, take a 5-10 minute walk in the fresh air during your lunchbreak. Get your circulation going.
- A simple exercise for which you do not even have to leave the room: Shake out arms and legs about 5 times a day for 30 seconds.

Expert Tips

EXPERT TIPS:

“Fresh air is a real all-rounder if you proceed with care and are well prepared. Outdoors, in air-conditioned rooms or wherever there are a lot of people in the same location, your immune system can withstand any onslaught – if you combine a healthy diet, sufficient exercise and a balanced lifestyle. For a holistic sense of well-being at any time of the year.”

LIFESTYLE

Your outer balance automatically affects your inner self. Less stress and more sleep are important elements for a functioning immune system.

- If you notice a cold coming on: treat yourself to a lot of rest and go to bed an hour earlier.
- If you still caught a cold, air the room several times a day. This reduces the concentration of infectious micro-organisms in the room.

NUTRITION

Our food contains so many beneficial substances: Especially plants and spices can boost our immune system.

- Kiwi is a real vitamin C powerhouse – with over 50% of the daily requirement in a single fruit.
- If you feel a little under the weather, Grandma's popular chicken broth with meat warms from within and is comforting.

MOVEMENT

In order to be fit and stay fit, exercise is the be-all and end-all. It doesn't always have to be an extensive workout.

- 5–10 minutes a day in the fresh air can already make a difference. Take a short walk and breathe in and out deeply through your nose.
- Do not sit in one position for too long. Get up often, stretch and take a few steps. Take a breath.

LIFESTYLE

"The skin is the mirror of the soul." That's why nothing makes you more beautiful than a good mood.

Laughter, joy, nature and friends – whatever does you good will have a visible positive effect.

- Beauty sleep. There is nothing that regenerates skin and body more than sufficient, restful sleep. Listen to relaxing music for 15 minutes before falling asleep, and go to bed a little earlier than usual three times a week.
- Cultivate calm. There is always a lot to do: but that should not spoil your mood. Stay cool, calm and collected!

NUTRITION

Beauty starts with nutrition:

"You are what you eat". The more valuable nutrients a food item contains, the better for the cells.

- Treat yourself to seasonal fruit that is rich in vitamin C. Strawberries, kiwis and currants are valuable sources of vitamin C. Vitamin C supports the regular collagen formation to maintain the natural skin function.
- Drink plenty of water (1.5-2.5 l/day).
Moisture keeps the skin firm and makes it look healthy.

EXERCISE

Regular exercise can rejuvenate the skin. Increased blood circulation makes the skin look younger.

- Running or walking.
Already 12-15 minutes of running or walking a day demonstrably has a visible positive effect, tightens connective tissue and rejuvenates the skin. Start right this week!
- Facial exercises – the sports trend. Training the facial muscles has been proven to reduce facial expression wrinkles. Of course, the best gymnastics for your face is a hearty laugh!

MADE IN GERMANY

"Made in Germany" is our quality promise, which you can count on 100%.

Skin:

Collagen is the most important structural protein of the skin and is decisive for moisture and elasticity. It provides structure, firmness and high moisture retention. Additional water-storing substances such as hyaluronic acid can only be stored in an intact collagen framework. The special thing about hyaluronic acid: it can bind an enormous amount of water. Hyaluronic acid is mainly contained in the intercellular spaces of the dermis. The body's own production decreases over time. Ingredients extracted from nature help to support the skin in a natural way.

Skin health:

A balanced supply of vitamins and trace elements improves skin function, helps to protect it from environmental aggressors and supports cell renewal. Especially important: vitamin C, vitamin A, the B vitamins, vitamin E as well as iron and zinc.

Connective tissue:

Collagen fibres are important for the connective tissue. They keep it firm and elastic. Connective tissue is found in all organs of the body. It penetrates muscles, fascia and organ sheaths up to the outer skin layers. Copper also makes an important contribution to regular connective tissue and supports the body's own processes.

Hair:

Biotin is a water-soluble vitamin and plays an important role in maintaining healthy hair. The B vitamins strengthen the hair, regulate sebum production and activate important metabolic processes in the hair root. Copper regulates the metabolic processes in the body, also in the hair cells. It particularly improves the hair structure.

Nails:

Toenails and fingernails consist of layers of horn lying on top of each other. Important nutrients are transported into the nails via the bloodstream. Zinc plays a central role in this context. It contributes to healthy growth and the firmness of the nails. But collagen peptides can also support nail growth.

Face Care

Aloe Vera Magic Bubble Mask

The new **Aloe Vera Magic Bubble Mask** offers deep cleansing with a fun factor. Immediately after application, it transforms into a foam of thousands of tiny crackling bubbles. The face mask thus frees the skin from environmental pollutants and skin flakes and prevents the deposition of harmful substances. You can see, hear and feel it! The result: intensely vitalised complexion. Simply magic!

For a fresh and radiant complexion.

MADE IN GERMANY

"Made in Germany" is our quality promise, which you can count on 100 %.

1 DETOX

Ginger and moringa extract remove dead skin cells and environmental pollutants (e.g. particulate matter and radicals), cleanses the skin from deep within and prevents further accumulation of pollutants by providing the skin with a lotus-like effect. Organic ginger extract offers additional skin protection.

2 MOISTURE

Aloe vera provides moisture and supports skin regeneration.

3 THE BUBBLE BOOSTER

The bubble booster increases oxygen supply and helps form tiny bubbles which enhance the detox and moisturising effect. This effect makes it easier to remove dirt particles, and the moisture can penetrate more deeply into your skin.

Aloe Vera Magic Bubble Mask

- Deeply effective, cleansing detox foam mask for the face
- with moringa extract, ginger extract, Aloe vera gel and bubble booster
 - prevents the deposition of pollutants
 - moisturises
 - The skin looks fresh and radiantly beautiful again
